## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher Brown on March 25, 2008.

2. The application has been amended as follows:

- a. Claim 10 has been cancelled without prejudice to its further prosecution in a continuation application.
- b. Replace the abstract with -- A method of producing seat belt webbing is proposed in which the webbing is first woven using at least two synthetic yarns of different colours of which at least one yarn is spun-dyed, and using weaves that are known per se, and that is distinguished in that the webbing is then subjected to treatment in a water-bath containing at least one disperse dye. Seat belt webbing produced in this way and seat belts containing such webbing are also claimed. --
- c. In claim 16, line 1, after "wherein the" add -- synthetic yarns have a --
- d. In claim 16, line 2, delete "is"

- e. In claim 18, line 2, replace “increase” with – improve –  
(basis for the amendment found in applicant’s specification paragraphs  
0010 and 0017)

### **REASONS FOR ALLOWANCE**

3. The claims are allowable over the closest prior art of record, Sasamoto et al. (JP 01306647) because the prior art do not teach or fairly suggest the instantly claimed steps of forming a seat belt. The claims are also allowable over Van Leeuwen et al. (US 4,473,617) because this reference does not teach or fairly suggest dyeing with disperse dyes after forming a seat belt from colored yarns.
